Hollis Ware

Caring for your piece

Stoneware, fired to cone 6. The glaze is food safe.
Dishwasher and microwave safe.
Avoid going straight from the fridge to a hot oven:
big temperature jumps can crack any stoneware.
The bare rim and foot are unglazed on purpose.
They'll darken a little with use. That's fine.
Small iron spots in the glaze come from the clay.
No two pieces in a batch are exactly alike.
